

OPNET

OPNET Modeler accelerates the R&D process for analyzing and designing communication networks, devices, protocols, and applications. The modeler incorporates a broad suite of protocols and technologies, and includes a development environment to enable modeling of all network types and technologies. Users can analyze simulated networks to compare the impact of different technology designs on end-to-end behavior. - See more at: <http://www.exuberantsolutions.com/opnet-modeler-training.htm#sthash.RgA3pbKb.dpuf>).

TRAINING DURATION	30. Hrs / 5 Weeks / Customized
TRAINING CHARGE	7,000+ Service Tax

- OPNET Modeler OPNET stands for Optimum Network Performance.
- OPNET is a computer software to simulate communication networks.
- OPNET Modeler in particular
- OPNET provides graphical editors to you to edit your own devices
- configure your own networks
- design your own protocols
- define your own packet formats
- Main features of OPNET simulator The graphical modeling approach(Graphical user interface).
- The generation of statistical data is
- customizable.
- A variety of comprehensive analysis tools.

- OPNET Workflow Create network models Choose statistics Run simulation View and analyze results
- OPNET's Hierarchical Modeling Three-Tiered Hierarchical Modeling
- Network
- Node
- Process
- Editors Network Editor
- Specify network topology and configure nodes and links
- Choose results
- run simulations
- view results
- Editors (cont..) Node Editor
- Create models of nodes by specifying internal structure and capabilities
- Create your own devices
- Editors (cont..) Node Editor
- Create models of nodes by specifying internal structure and capabilities
- Create your own devices

TRAINING SCHEDULE - Please contact us for latest training schedule

TRAINING MODE

We give flexible learning options to trainees

- Instructor Lead (REGULAR / ONLINE / WEEK-END / PART-TIME / COMBINED-FLEXIBLE)
- INSTRUCTOR LEAD LIVE ONLINE TRAINING MODE - You can join the training from any part of world
